ADVANCED THEORY AND SIMULATIONS

The background of the cover is a dense, blue, semi-transparent lattice of spheres and sticks, representing a molecular simulation. A central horizontal band features a green, wavy surface with a blue ribbon-like structure. Below this surface, several circular insets of varying colors (blue, green, yellow) show detailed ball-and-stick models of complex organic molecules, likely polymers or biomolecules, with atoms colored in white, red, green, and blue.
